MUJIA

PROJECTION SCREEN

ULTIMATE VISUAL CRAFTSMANSHIP PRESENTATION

Mu Jia (MU+) is a Japanese projection screen authority specializing in the manufacturing and sales of projection screens and related equipment. In the early days, it was aimed at the Japanese cinema market. MU+has many years of production experience and adheres to strict quality control, and now the brand has gained a high status both domestically and internationally in Japan.

Mu Jia (MU+), every screen material is meticulously crafted and has always been highly recognized by professional film institutions and film enthusiasts. Mu+corresponds to different movies, projectors, and projection screens that can be used in different environments, maximizing the level and performance of movies and projectors.

MU+has an excellent software and hardware technology research and development team. Throughout, due to its practicality and innovation, as well as excellent products, the brand has received countless praises in the industry.

MU+projection screens have a 36 year history of development and have been highly recognized by professional fields and film enthusiasts. In today's rapidly changing imaging technology, MU+projection screens have not stopped their pace of development to correspond to the upcoming new optical screen materials with ultra-high resolution (4K/8K), 3D, high brightness, high dynamic range (HDR), and high-quality images.
